COST-EFFECTIVE AND ECO-FRIENDLY PACKING CRATES FROM THE BEST IN THE BUSINESS

SIMPLICITY IN PRICE

Our costing is simple. The reusable nature of our crates means that Alban shipping will charge a percentage of the delivery charge to cover the cost of your crate(s), allowing substantial savings to both you and your clients.

WHY USE REUSABLE CRATES?

SIMPLE TO USE

INTUITIVELY DESIGNED, MULTI USE ARTWORK PACKAGING

ZERO WASTE TO LANDFILL

One of the issues with single-use packaging is that it is often discarded after the contents have been moved. Alban Shipping's reusable artwork crates mean less plastic, foam and timber goes to landfill.

Our multi-use crates have been designed to secure artworks of various sizes within the same crate, enabling you (and us) to reduce our carbon footprint. By using the crate to transport your artwork on our own vehicles within the UK & Europe, we can offer you additional security, while you can reduce any requirement by your clients to dispose of unwanted packaging.

SIMPLICITY IN DESIGN

As specialist shippers to many national and international auction houses, our reusable cases can be used for collection and delivery of artworks, prior to, and post, sale. In addition, our cases offer a high level of protection (each case is supplied with security seals). The cases can be opened simply and easily, and once artwork has been removed for inspection, the crate can be stored for future use.
